

How the Swine Flu Vaccine Will Become Mandatory and Why Most Citizens Will Take It

Below is a hypothesized timeline on how the H1N1 vaccine will become mandatory which will eventually lead to having a RFID (Radio Frequency Identification) chip implanted in your hand. If the following events occur, perhaps it will help you to understand how you could be manipulated into taking the vaccine if you are currently undecided or even if you are dead set against taking it.

1. Test lethality of H5N1 (bird flu) virus in injectable form - June 08

In June '08, 21 out of 350 homeless people in Poland died after being injected with the H5N1 (bird flu) vaccine. See link below (1. Vaccine Trial in Poland).

It is my supposition that eugenicists, elites who believe the human race should be depopulated in order to save the planet's ecosystem, were attempting to find the correct dosage of H5N1 (bird flu) virus required to cause death. See link below (2. The Swine Flu Revolution: Depopulation & Eugenic (excellent video)).

2. Introduce H1N1 (swine flu) virus into the population - March 09

In late April of 2009, the swine flu breaks out in Mexico City. Scientists said the virus combines genetic material from pigs, birds and humans that researchers have not seen before. We are very, very concerned, World Health Organization spokesman Thomas Abraham said. We have what appears to be a novel (new) virus and it has spread from human to human. See link below (3. Swine Flu is Man Made).

3. Declare World Health Organization Level 6 Pandemic - June 09

The purpose of declaring a Level 6 pandemic is to provide vaccines to the 194 countries which are members of the WHO, especially the undeveloped countries who could not develop nor afford the vaccines. The goal of the WHO is to produce 3 billion H1N1 vaccines within the next year.

4. Develop and manufacture the H1N1 vaccine - June 09 to Present

The US government ordered 195 million H1N1 vaccines for this year's flu season. Since only 195 million vaccines were ordered and the population of the US is 300 million, there will not be enough vaccines for everyone. Couple this fact with the fact that no states have yet signed into law mandatory H1N1 vaccinations, it is unlikely the vaccine will be made mandatory this flu season. However, the number of doses could be increased by mixing the vaccines with a squalene adjuvant, and in the event of a deadly mutation, emergency laws could be passed quickly. For more information on squalene adjuvant, see the message below entitled They Want to Inject Me with the Same Stuff that Caused Gulf War Syndrome?

5. Hype the vaccine - July 09 to Present

As of October 11, 2009, the World Health Organization reports that 3406 people have died from the swine flu virus in the Americas, which includes South, Central and North America. The combined population of these regions is around 960 million people. According to the CDC, the common flu kills over 35,000 people per year in the United States alone. So why is there

all this media hype about how important it is to have the H1N1 vaccine? See link below (4. Just Get Your Damn Vaccine (excellent video)).

Also, learn how the mainstream media is owned by a handful of people by researching keywords controlled mainstream media. These few people dictate what the "talking heads" read off their teleprompts. Most of the general population simply assumes without question that the information being presented is accurate. See link below (5. The Controlled Media).

6. Introduce live H1N1 virus mist vaccine and spread the virus more - October 5, 2009

The first of the H1N1 vaccines were distributed on October 5. These vaccines were the inhalable mist type which contain live H1N1 virus and are sprayed into the nose. It seems to me that this would make people contagious and spread the virus even more. In fact, some school districts have refused to use this type of vaccine. See link below (6. CDC Admits Nasal Spray is Contagious).

7. Introduce injectable H1N1 vaccines - October 15, 2009

On October 15 the injectable vaccines were released. As previously mentioned, the US government ordered a total of 195 million doses, and since there are over 300 million people in the US, there will not be enough vaccines for everyone. Currently, there is allegedly a delay in vaccine production. I have already seen long lines on television. Long lines for anything create a type of herd hysteria; e.g. movies, concerts, Christmas toys. People think to themselves Wow, look at that long line. Am I missing out on something?

8. President Obama officially declares Swine Flu a National emergency October 23, 2009

Obama wrote in the declaration, "As a nation, we have prepared at all levels of government, and as individuals and communities, taking unprecedented steps to counter the emerging pandemic." Notice the wording the emerging pandemic.

When the president declares a national emergency, two constitutional rights are subject to revocation:

- The right of habeas corpus
- The right to a grand jury for members of the National Guard when in actual service

Habeas corpus is a writ through which a person can seek relief from unlawful detention; i.e. quarantine. It has historically been an important instrument for the safeguarding of individual freedom against arbitrary state action.

9. Deadly pandemic begins in the Ukraine October 30, 2009

There is a deadly pandemic occurring in the Ukraine. It is unknown whether this is a H1N1 mutation or something different. In August, Joseph Moshe called into the Dr True Ott Show on Republic Broadcasting and claiming he was a microbiologist who wanted to hand over evidence to a States Attorney regarding tainted H1N1 vaccines being produced by Baxter International in the Ukraine (the same country that is currently having a deadly pandemic). He claimed that Baxter's lab was actually preparing a bio-weapon disguised as a vaccine. See links below (7. YouTube 205,000 sick in Ukraine Swine Flu Pneumonic Plague; 8. Joseph

Moshe Arrested Ukraine New Pandemic ; 9. Has Baxter Released A Bio-Weapon In Ukraine?).

10. Insert a fractional percentage of live H5N1 (bird flu) virus into injectable batches of H1N1 vaccines Nov 09

I surmise within several weeks of the initiation of the swine flu vaccine injection, the percentage of people who die after supposedly contracting the virus will rise ever so slightly, such that very few of us will suspect that the vaccines have anything to do with the increase in the mortality rate. But what will really be causing the increase in deaths is that a tiny percentage (less than 1%) of the vaccines will contain the lethal H5N1 (bird flu) virus that was tested on the homeless in Poland.

11. Aerial spraying begins in the United States?

There have been several reports by US citizens of low flying planes being heard in the early morning going back and forth over towns in Iowa and Wisconsin. Are US citizens are being sprayed with a substance that causes a flu-like disease? See link below (10. Aerial Spraying in Wisconsin; 11. Polk County, Iowa Coroner Were Seeing Hemorrhagic Bloody Lungs)

12. Media mentions that the death rate has increased. Note that the death rate prior to vaccinations was 1.2% Nov-Dec 09

The mainstream media will spin this slight increase in deaths by saying the H1N1 virus may have mutated into something more deadly, and that scientist are monitoring the situation very closely. They will also say that it is more important than ever to get the swine flu vaccine, because although the virus may have mutated, the vaccine is still your best bet for protection. However, there will still be a vaccine shortage and the media will be showing long lines throughout the country to hype the herd. See link below (12. H1N1 Mutation Discovered in Norway)

13. Increase the percentage of live H5N1 (bird flu) virus in vaccines and aerial spraying to increase death rate to 2% - Dec-Jan 10

Most likely there will be one or two major cities where the deadly H5N1 vaccine will be given to a higher percentage of the population to create the illusion of a virus that is highly contagious.

14. Media begins to really hype virus mutation Jan 10

This is when the real hype will begin as the media will be covering the swine flu pandemic nonstop stating that the virus continues to mutate into something more deadly. But still, there is a vaccine shortage. Long lines are everywhere. As you can imagine, a shortage of something that can supposedly save your life will be a very high-demand item.

15. Continue to increase the percentage of live H5N1 (bird flu) virus in vaccines and aerial spraying to increase death rate to 3% - Jan-Feb 10

16. The media is now stating There is no question, the virus has mutated and if you do not get the H1N1 vaccine, you will be endangering your family, friends, coworkers and anyone else you may come into contact with. Jan-Feb10

There will be reports of rioting at vaccine distribution locations. Perhaps you will even hear about right-wing militia groups stealing the vaccine. This will be a complete fabrication, unless of course the militia group is stealing the vaccine to destroy it. Regardless, it will be the excuse the government will use to get the National Guard and perhaps even the military involved in protecting distribution centers.

17. Continue to increase the percentage of live H5N1 (bird flu) virus in vaccines and aerial spraying to increase death rate to 4% - Feb-Mar 10

18. Flu season ends with H1N1 death rate at 4 to 5% - Mar-Apr 10

19. Media hypes mandatory H1N1 vaccination stating we need to create a herd immunity to protect those who cannot take the vaccines because of compromised immune systems - Spring 10 thru Summer 10

You will begin to see a lot of media hype that the vaccine should become mandatory for the next flu season. The media will tell us that it is important for everyone to take the vaccine so that we can develop a herd immunity. This will not be true because for the flu virus, herd immunity is impossible as it mutates too rapidly.

According to Wikipedia, the following diseases have herd immunity thresholds: diphtheria, measles, mumps, pertussis, polio, rubella and smallpox. Notice there is no mention of influenza. See link below (13. Herd Immunity).

The media will begin stating that if you do not get the H1N1 vaccine, you will be endangering those with suppressed immune systems who cannot be vaccinated (e.g. newborns, HIV infected, organ transplantees, chemotherapy patients, etc). People who claim the vaccine is harmful will be ridiculed by the media as paranoid and will be labeled as a danger to society, i.e. a terrorist. And because habeas corpus will have been suspended by then, they will be detained without due process.

20. States begin to pass legislation making H1N1 vaccination mandatory - Summer 10

The Model State Emergency Health Powers Act, drafted in October of 2001, provides a guideline for states to use when legislating mandatory vaccination laws.

1. Force persons to be vaccinated, treated, or quarantined for infectious diseases.
2. Impose fines and penalties to enforce their orders.
3. Preempt existing state laws, rules and regulations, including those relating to privacy, medical licensure, and property rights (i.e. your property could be seized).
4. Mobilize all or any part of the organized militia into service to the state to help enforce the state's orders.
5. Ration firearms, food, fuel and alcoholic beverages, as well as other commodities.
6. Track and share an individual's personal health information, including genetic information (RFID?).

Massachusetts already has a mandatory vaccination law that has passed both their House and Senate and is awaiting the signature of Governor Deval. The law states that if you do not

take the vaccine you can be fined \$1000 per day and you could also be quarantined and your property could be seized (the reason for property seizure would be it is contaminated with a deadly virus). Other states will begin to follow the precedence set by Massachusetts. See link below (14. Massachusetts Mandatory Vaccination Law; 15. Iowa Quarantine Order).

21. All states will have mandatory H1N1 vaccination laws in place - September 10

So here we are in the flu season of 2010. The vaccine has been made mandatory in the USA and perhaps even world-wide. The public is panicked, but the government is ready this time. They have enough vaccinations for everyone. Most likely the vaccines will have a squalene adjuvant in them and it will be justified as necessary in order to provide enough vaccines for everyone. For more information on squalene adjuvant, see the message below entitled They Want to Inject Me with the Same Stuff that Caused Gulf War Syndrome?

22. Mandatory vaccinations begin and 90% of population agrees to take the vaccine. You will be identified as having taken the vaccine by an RFID bracelet - October 10 thru January 11

Even if you have had the vaccination last flu season, the government will say you need another one just as you do with the regular flu because the virus has mutated. I am guessing that upwards of 90 percent of Americans will be receptive to taking the vaccine because of the increased death rate and because they believe the herd immunity deception. There will be no religious or philosophical exceptions.

There are several YouTube videos where people, some claiming to be military personnel, are saying the military is practicing road blocks and will give people a choice of being vaccinated or sent to a FEMA quarantine camp. They are also saying that you will be required to wear an RFID bracelet that proves you have taken the vaccine. See links below (16. RFID Bracelet; 17. Military Roadblocks).

23. If you have not taken the vaccine by January 1, 2011, you will be forcefully quarantined January 11 until Complete

I am guessing that about ten percent of US citizens will refuse to take the vaccine and will become outcasts and will be hunted down and quarantined. See links below (18. Fox News Mass Quarantines; 19. FEMA Camps; 20. FEMA coffins; 21. Mass Graves).

24. RFID Chip will be inserted into your body 2012 until complete

Once all the people who refused to take the vaccine have been rounded up and dealt with and those who took the vaccine have become comfortable wearing their RFID bracelet, there will be a push to have the RFID chips implanted in the hand. By this time, the RFID bracelet will be linked to databases that contain medical records as well as financial information. Without an RFID, it will not be possible to participate in commerce; i.e. one will not be able to buy or sell. There will be many alleged cases of peoples bracelets being stolen and the obvious solution is to implant the RFID chip into the hand. See links below (22. IBM RFID Commercial; 23. RFID Commercial; 24. RFID Implantation).

25. Timeline Conclusion

So there it is. The plan is to reduce world population and chip those who remain. The first culling of the population will begin by forcing vaccines on the people. Naturally, those who refuse to take the vaccine would sure as heck refuse to have a chip implanted in them. So, it would make sense to identify these people and remove them from the population first. Those who remain will think, what a shame, if only they were not so paranoid and had taken the vaccine. But the vaccinations will continue because the virus will allegedly continue to mutate and people will continue to be killed off by vaccination until the world population is deemed to be at an acceptable level by the eugenicists. According to the Georgia Guidestones, that acceptable population will be 500 million people. Currently, there 6.8 billion people, so that would mean 6.3 billion people would have to be eliminated. See link below (25. Georgia Guidestones).

26. We must resist!

I know the way I have described this sequence of events seems bleak, but there is hope! If the vaccines are made mandatory, we must resist. If enough of us stand up and say no to the vaccine, then some of those who lacked the courage to say no will find their strength in numbers. And then, some of those who were pretty much clueless about why anyone would refuse the vaccine will also begin to awaken. And then even more people will rise up until there is a mass awakening and We the People will re-establish our Constitutional Republic and take our country back from the international banking cartels (see link below (26. Money as debt)) and live peacefully as truly free human beings.

So I encourage everyone who reads this to take some kind of action. If you think this is a bunch of nonsense, take the action to research the links I have provided. If you become convinced or are already convinced that these events could happen, spread the word in whatever way you feel works for you. Above all, believe that we will be successful in our resistance because faith can move mountains! But do not wait. Now is the time to act. The government already has plans to limit internet bandwidth to non-essential websites in the event of a pandemic. The rationale is that so many people will be at home due to the pandemic that the internet will be clogged with game players and joy seekers. I am pretty sure YouTube, where the real news can be found, will be considered one of those non-essential websites. See link below (27. SEC and Homeland Security need Web backup).

They Want to Inject Me With the Same Stuff that Caused Gulf War Syndrome?

A squalene adjuvant was used in anthrax vaccines and is what caused Gulf War Syndrome, an autoimmune disease. Symptoms attributed to Gulf War Syndrome include chronic fatigue, loss of muscle control, headaches, dizziness and loss of balance, memory problems, muscle and joint pain, indigestion, skin problems, shortness of breath, insulin resistance, brain cancer, fibromyalgia, and amyotrophic lateral sclerosis (Lou Gehrig's Disease).

The purpose of an adjuvant is to increase the effectiveness of a vaccine thereby making it less costly to produce more vaccine. However, a squalene-based adjuvant is detrimental to human health. The human body has natural squalene within it, but when squalene is injected unnaturally into muscle tissue, the body sees it as a foreign substance and creates antibodies to destroy all squalene within the body and this results in an autoimmune disorder.

Once your immune system creates squalene antibodies, these antibodies will continue to attack the natural squalene in your body indefinitely. You will be sick the rest of your life and your life will most definitely be shortened.

Go to US Department of Health and Human Services via this link

<http://www.hhs.gov/news/press/2009pres/07/20090713b.html> (Humans and Health Services government site)

and see that over \$400 million was spent on bulk oil and water adjuvants for the H1N1 vaccine. The bulk oil adjuvant is squalene. Currently, government officials claim that no squalene will be in the H1N1 vaccine, but they say that could change if the virus becomes more deadly and there becomes a need to increase the production of the vaccine. It seems to me that the government must be pretty sure the virus is going mutate; why else would they spend nearly half of a billion dollars on adjuvants?

Listed below are several links which discuss the H1N1 vaccination and the squalene adjuvant.

<http://www.youtube.com/watch?v=l05xIFyBIPs> (Just get your damn vaccine excellent video)

Campbell vs. the US: Comprehensive Federal Lawsuit Against Forced Vaccinations

http://www.fourwinds10.com/siterun_data/government/judicial_and_courts/news.php?q=1256406141

Excerpt: There presently exists a bank-based transnational corporate criminal conspiracy to violate the fundamental constitutional rights and wellbeing of the American people, including those of the plaintiff, through fraudulent political, legal and financial contracts in the form of surreptitiously signed/enacted international treaties and federal laws/executive orders enabling the mandated imposition of bio-weaponized H1N1 influenza vaccinations and quarantines/detentions through martial law. The aforementioned measures, being fraudulent, are therefore null and void, with no legitimate power to be enforced by any government, national or international, upon the American people.

For those of you who believe God communicates with us through visions, go to this link and read Pastor Matutis vision about the swine flu vaccine.

http://www.stevequayle.com/News.alert/09_Prophetic/090728.swine.flu.dream.html

Don Harlan
